## SHIPPING INFORMATION

All plants carefully packed (with no charge for same) and shipped by Express unless otherwise ordered. Plants ordered by freight shipped in good order at buyer's risk. All shipments f. o. b. New York. Express charges on plants have been reduced to a minimum by all the Express Companies so there is little or no more expense and no risk in shipments all over the country.

Customers not rated by any Commercial Agency, or unknown to us, please send references with orders, or half payment for same.

# Orchids

Freshly Imported, Semi Established and Established

---

## IMPORTANT INFORMATION

ORDERS GIVEN US INSURE DELIVERY. Our collectors are the old and tried with YEARS OF EXPERIENCE and never know failure. We deliver the goods when all other importers fail. We have every facility and ample means and DO NOT DISAPPOINT OUR CUSTOMERS. The failure to deliver stock, means a year's loss to the grower. The delivery of fresh stock out of season also means greater loss.

OUR FRESH IMPORTATIONS which are constantly coming forward from their native habitat, are the best for DEVELOPING RARE SPECIMENS.

SEMI ESTABLISHED PLANTS are the best adapted for a BEGINNER or for one who has not given his order in advance, as they produce the same results as the fresh imported stock, having never flowered since being potted, and are as liable to bring out rare specimens, all having their NATIVE STRENGTH. All purchasers have an equal chance of developing rare plants. We make no selections, either in the mountains or from the importations. WE SELL NO FLOWERS OR SELECTED RARE PLANTS. Our collections have produced more VALUABLE SPECIMENS from native stock than have been known before, and our importations are the largest in the United States.

OUR POTTED PLANTS are all good strong growing plants and are of the species Cypripediums, Miltonias, Vandas, Phaelanopsis etc.,—plants that require immediate potting after arriving, also plants that are desired only in small quantities, where advance orders are not given. Prices given on extra large plants of any variety, if desired.

OUR LIST OF LANDSCAPE GARDENERS AND GREENHOUSE MEN is the best. We only recommend those that are competent, and those desiring such, can be put in communication at once.

OUR LONG EXPERIENCE in shipping plants LONG DISTANCES has perfected our system of packing. We guarantee safe arrival if sent by express. TO REDUCE EXPRESS CHARGES the plants may be removed from the pots WITHOUT INJURY, and again replaced in the same size pots on reaching the destination. WE MAKE NO CHARGE FOR PACKING. Growers wishing any information in regard to the culture of Orchids will be supplied free of charge.

## CATTLEYAS

	<i>Native Country.</i>	<i>Doz.</i>	<i>Each</i>
CAT. BOGOTENSIS	COLOMBIA.	\$18.00	\$1.75
	Potted in 5 1-2 and 6 in pots. Flowers in Jan. and Feb. Color, light pink with dark magenta lip. Grows in night temperature of 60 degrees Far.
